

## Exercise Pro Networking and Multi Computer Install Options

If your facility is currently licensed to be running Exercise Pro on a single computer and would like to have Exercise Pro on multiple computers or at more than one location there are a variety of options and very moderate, reasonable and affordable prices.

### Network Upgrade Options

**1. Upgrade your single computer install to a multi license network.**

Advantages:

1. Less cost per running copy of Exercise Pro.
2. Less expensive to add more copies.
3. Ability to share information between the computers.

**2. Upgrade your single computer install to a multi license and multi location network.**

Advantages:

1. Less cost per running copy of Exercise Pro.
2. Less expensive to add more copies.
3. Ability to share information between the computers and the locations.

**3. Upgrade your current multi license network install to a multi location network or increase current number of copies.**

Advantages:

1. Less cost to include Exercise Pro at other offsite, new or satellite locations.
2. Less expensive to add more copies.
3. Ability to utilize Exercise Pro at more than one location.
4. Ability to share information between the locations.

### Non Network Options (If the computers are not or cannot be networked.)

**Purchase additional single computer install licenses for other computers or locations.**

Advantages:

1. Discounted prices when buying two or more.
2. Excellent solution for install on "roving" laptops, such as with Home Health.
