
Network Setup

Server Install

1. Insert the *Exercise Pro* CD ROM into your drive on the server.
2. Click **Start: Run**
3. Type **d:\setup** (d = your CD drive) and then click the **OK** button.
4. During the setup, install *Exercise Pro* onto a drive which is accessible to all machines on the network that are going to run *Exercise Pro*.
5. **Do Not** select the **Network Client** check box.
6. Start Exercise Pro and register it with the code provided.

Workstation Install

1. Insert the *Exercise Pro* CD ROM into your drive on the workstation.
2. Click **Start: Run**
3. Type **d:\setup** (d = your CD drive) and then click the **OK** button.
4. Install *Exercise Pro* onto a local drive.
5. During the setup, select the **Network Client** check box.
6. On the following screen, select the server directory in which *Exercise Pro* resides.
7. Start Exercise Pro and register it with the code provided.

Enabling More than One Concurrent Copy on the Network

1. Start *Exercise Pro* on any machine.
2. Open the **Setup** screen by selecting **File: Setup** from the main menu.
3. Click the **Add** button and enter your network code.

Note: The network code is in the documentation included with the purchase of *Exercise Pro*. The network code is different from the main code. Once the code is accepted, your network will be enabled to run multiple concurrent copies of *Exercise Pro*.

Note: Unless otherwise noted in your license letter this software is licensed to be used in only one physical location. Any location further than a 15 minute walk is defined as another physical location.
